Projects

SIMS

Inventory Management System

- Developed a comprehensive Inventory Management System to streamline the tracking and management of products and supplies.
- Implemented features for tracking purchase orders, stock levels, and product movement, increasing operational efficiency.
- Integrated real-time dashboards for monitoring product status, enabling better decision-making and inventory control.

AbisoIVC

Geolocation Mobile App

- Developed a mobile application called AbisoIVC using Expo.
- Utilizes geolocation for real-time tracking of rescuers and the location of victims or requestors.
- Enhances emergency response times and improves the coordination and efficiency of rescue operations.
